2nd Quarter 2021

ONLINE ACCOUNT REGISTRATION

We recently converted our main database over to a newer and more secure software. The conversion went fairly smooth. However due to the conversion each customer with an account online will need to re-register. One caveat for the new registrations is that you cannot use your prior username. We apologize for this inconvenience. Should you have any problems registering your new account, please call the office at 719-488-3603.

SUMMER HIRES

It's that time of year again! We will be hiring several summer hires to perform basic maintenance and yard duties to include: painting, cleaning, mowing, fence repair, etc... of the District facilities. Applicants should be students pursuing secondary education. Preference will be given to District residents. These are temporary positions with no benefits. Starting pay is \$14.75 per hour. Applications may be downloaded from our website, www.donalawater.org and can be mailed in, brought to the office or emailed to om@donalawater.com. The deadline to submit an application is April 30th. Pre-employment drug screening and a driving record review are required.

CONSTRUCTION

The 2021 water line replacement project is anticipated to begin in May. The impacted areas include the Gleneagle Townhomes, Club Villa Townhomes and Mission Hills Way (east of Gleneagle Dr.). Scope of work includes replacing the water main and the service lines as well as adding 15 new fire hydrants. We are projecting this to be a 3-month project. There should be no impact to traffic on Gleneagle Drive.

MONUMENT SANITATION

Donala has been asked by Monument Sanitation District to provide sanitary sewer operations and ORC (Operator in Responsible Charge) licensing services. This is a 6-month agreement. Staff is monitoring their SCADA system and make 3 visits per week to their lift stations. Staff will also respond to any special and emergency situations. This agreement may be renewed for successive 6-month terms or on an annual basis.

HYDRANT FLUSHING

Each spring we flush the distribution system to clean out the lines. While flushing, the iron sediment that has settled in the pipes will be dislodged and can find its way into your plumbing. We recommend not doing laundry on that day and running your water for a few minutes after our flush to clear your lines of sediment. Please understand that although we will try to be sure the water stays in the street or ditches, there is a potential for landscaping to be affected. Those properties that have gravel, mulch and other landscape materials in the drainage right-of-way up to the edge of the roads, run the risk of minor "wash outs". Our only option is to skip those areas when flushing. Recent experience has shown us that is not a good option. We need to opt for water quality over landscape effects. We will attempt to keep the effects to a minimum, but we ask you to help by edging your vulnerable areas to keep the water away.
